

SAFETY CABINET FOR CORROSIVE GOODS

Our Safety Cabinet for Corrosive Goods stores a variety of corrosive substances, including household cleaners and industrial chemicals like chlorine and sulfuric acid. It ensures secure storage by type and class, preventing chemical reactions. Perfect for both residential and industrial settings, this cabinet is essential for any

environment handling corrosive materials.

- **Heavy-duty.** Double walled thermal barrier.
- **Safe.** Underside safety strapping to prevent cabinet tipping over
- **Strong.** Metal Cabinet
- **Self-closing.** Sequential door closing mechanism
- **Adjustable.** Shelf height and levelling feet.
- **Smart.** Polyethylene spill collection trays on each shelf and in sump to protect against accidental spills and leaks.
- **Secure.** Key lock door handles and three point latch locking.
